

CISO SOLUTIONS CISO FOOTPRINT

This CISO FOOTPRINT™ is a quick to complete pragmatic tool designed by security professionals to help you determine your organisation's approach and level of maturity towards cybersecurity. The values you provide in the question set are not expressed as numbers rather as a graphic (Footprint) that can then be used to compare your company's relative bias and approach to cybersecurity and thereby create an outline benchmark for discussion and review.

You can complete your profile and receive your Footprint on the Ascot Barclay website www.ascotbarclay.com

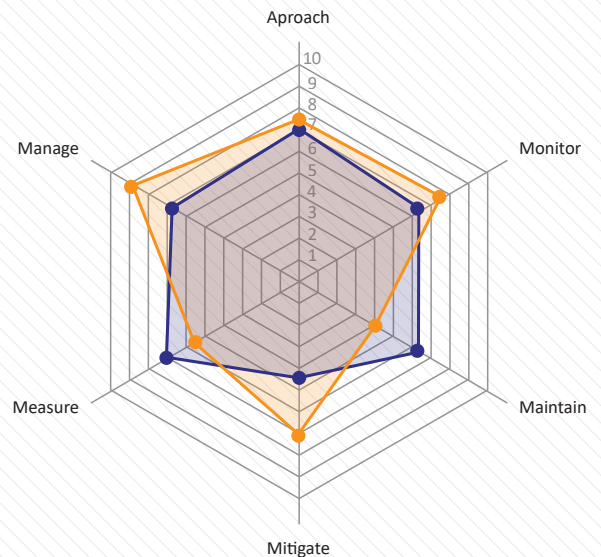

The CISO FINGERPRINT™ is a complementary tool in our CISO Solutions suite and is designed to focus on identifying the style of a CISO set against the organisation's cyber security maturity which we capture in the CISO FOOTPRINT™.

CISO FOOTPRINT™

Compare Your Organization with Others

- Your Company
- Other companies

DISCOVER YOUR ORGANISATIONAL CYBER FOOTPRINT:

The many assessment results received thus far illustrate that organizations have a different attitude, culture and maturity level with respect to Cybersecurity. Completing the short question set on the Ascot Barclay website will help identify yours. So what is this assessment?

The CISO FOOTPRINT™ based on the answers you provide, presents a graphical image of your organization's approach to Cybersecurity risk management and mitigation, and covers:

- 🛡️ Approach – Cultural Observations
- 🛡️ Management - Key Leadership Factors
- 🛡️ Monitor – Visible oversight of security posture
- 🛡️ Measure – Capture current security baseline, prioritise and plans
- 🛡️ Mitigate – Risk mitigation and resolution
- 🛡️ Maintain – Achieve and hold an appropriate level of security resilience

Your report, once completed, is for your eyes only. We do where appropriate anonymously aggregate data for comparative purposes.

Use filtering to make comparison with different sized companies

- Company size
- 1 - 20
 - 20 - 100
 - 100 - 500
 - 500 - 2500
 - 2500 and above

THE ABG 5M ROUTE TO HACKER HARDENED™

THE ASCOT BARCLAY GROUP (ABG) HAVE, OVER MANY YEARS, EVOLVED OUR 5M STRATEGIC APPROACH TOWARDS ASSISTING OUR CLIENTS BECOMING HACKER HARDENED™. THE STEPS WE RECOMMEND AND HELP IMPLEMENT INCLUDE:

1. MANAGE & LEAD

We provide our clients with experienced interim or virtual CISO and senior security leadership capabilities and cyber security resources to complement, deliver or lead the CISO office to support an efficient and effective security Target Operating Model (ToM).

2. MEASURE

Capture your current security posture and level of risk exposure. Baseline your cyber and security controls and maturity level to define and inform your business strategy, policy, budget and critical defensive projects and security capabilities.

3. MONITOR

Provide real time oversight of your security estate and identify areas that are potentially open to exploitation. Monitor for anomalies and changes in network behaviour to identify possible internal and external breaches. Provides executive insight for improved decision making and compliance with ISO27001, PCI DSS, NIS, NIST, GDPR....

4. MITIGATE

Penetration and adversarial Red Team Testing to identify gaps across; physical security, digital (cyber) security (IT & OT/ICS) and associated human factors. Prioritise mitigation strategies and solutions based on your level of risk appetite, evolving threat landscape, availability of budgets together with cultural and resourcing requirements.

5. MAINTAIN

Virtual or 'as-a-service' on-going executive oversight and management of your security estate. Recognising the business together with legislative and security threat landscape changes frequently we help you achieve and maintain HACKER HARDENED™ status on going. Let us manage your security for you – we can support or complement your existing team or operate as your security department.

ASSESSMENT

*This **CISO FOOTPRINT** is a pragmatic tool and **NOT** a test and as such there are no right or wrong answers in completing it. We recognise there is a degree of professional subjectivity in your answers which is, of course, reflected in the results. The scores you provide are not expressed as numbers rather as a graphic (Footprint) that can then be used to compare your company's relative bias and approach to cybersecurity and give an outline benchmark for discussion and review. You can complete your profile and receive your Footprint on the Ascot Barclay website www.ascotbarclay.com*
